

HLI Rail & Rigging Partners with GreenStream to initiate Greenhouse Gas Initiative and Climate Strategy Program

Houston – December 2022 – HLI Rail & Rigging announced it will commence its Climate Strategy Program, which will consist of its first annual Greenhouse gas (GHG) inventory in accordance with Greenhouse Gas Protocol Corporate Standard; Supplier GHG Assessment; and Climate Strategy Action Plan. This program will involve a detailed assessment of the carbon impacts of HLI’s business, setting science-based targets to reduce GHG emissions, and developing a business strategy to reduce energy consumption and operational GHG emissions. HLI will also seek to work with its suppliers and partners to reduce GHG emissions throughout the supply chain.

HLI has engaged GreenStream Sustainability Consulting to lead and advise on these efforts. “I’m excited to work together with HLI to identify opportunities to minimize climate impacts,” said Max Pinnola, Owner of GreenStream Sustainability Consulting.

“At HLI, we understand the importance of climate change and our role as a business to transition and thrive in a low-carbon future. We are excited to work with GreenStream to identify and implement impactful energy and GHG initiatives,” said Ross McLaren, Partner at HLI.

About GreenStream: GreenStream is a sustainability consultancy that operates under the philosophy that – when properly managed – sustainability can be a significant driver of financial returns and overall business value. GreenStream translates energy efficiency into cost savings and impact data into future-proof business strategies. Max Pinnola brings over 10 years of experience conducting GHG inventories and implementing corporate climate strategies.

About HLI: HLI Rail & Rigging, LLC specializes in the transportation of over-dimensional loads by the most cost-effective and safe methods available, utilizing our extensive network of expert suppliers.

Although established in 2007, the management team brings over 225 years of experience to meet its customers’ transportation and installation requirements. The founding team of Ross McLaren and Mike Scott both began their careers back in 1978. Ross was focused on Crane, Trucking and Rigging, and Mike specialized in Railroading. Both have accomplished and achieved great success in their respective fields. The U.S. offices are in New York, Pennsylvania, Texas with a recently opened representative office in Europe. HLI also has storage facilities in Houston, San Antonio (rail served) and Laredo Texas and owns a fleet of 12 and 20-axle railcars.
